

Specs

Use any non-conductive pipe with a tesla coil (electrons shot at water) on two parts (example, one inch apart).

Title of invention

Ozone maker

Background of the invention

Physics

Brief summary of the invention

This invention will make ozone

Detailed description of the invention

Use plastic or other non-conductive material and make its shape into a tube. Then put tesla coils into two parts (one example is one inch plastic, one wall tesla coil, one inch plastic, one wall tesla coil (with power) one inch plastic)

Claim:

This patent or invention will make ozone.
